# EXECUTIVE SUMMARY

---

- Relevant skills required in the field of IT and business consulting are ever-changing and evolving.
- It is important to identify future skill requirements and trends to keep pace with changing technologies and remain competitive.
- This presentation will identify current and future trends in Programming Languages, Databases, Platforms and Web Frames.
- Overall, the aim in identify future skill requirements and trends helps our firm make more informed data-driven hiring and budgetary decisions.

# INTRODUCTION

---

- This presentation is created for stakeholders and business decision makers within the global IT and business consulting services firm.
- This will help identify future skill requirements in the global IT sector necessary for the firm to keep pace with changing technologies and remain competitive.
- Recommendations will be stated based on the analysis.
- Reader may gain some insights into current and future trends of technological applications.

# METHODOLOGY

- Data about number of job postings and average salary of different languages were collected from websites (e.g: Kaggle), json URL using APIs and Webscraping, which were then stored in excel and csv file.
- Using a modified subset of the Stack Overflow dataset, the data was first wrangled: removing duplicates, imputing missing values and normalizing data.
- Next, the data underwent exploratory analysis in order to find the distribution of data, presence of outliers and determine the correlation between different indicators in the dataset.
- The data was then used to visualize the distribution, the relationship between two features and the composition and comparison of data.
- Finally, Cognos Dashboard Embedded (CDE) was used to create the “Current Technology Usage”, “Future Technology Trends” and “Demographics” dashboards.

# RESULTS

---

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Top 10 Languages Currently Used

## Next Year

Top 10 Languages Desired Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

## Findings

- JavaScript and HTML/CSS are the top 2 most prevailing programming languages even in this year and next year.
- Python and TypeScript may gain more interest next year.
- Preference in SQL and Bash/Shell/PowerShell shows sign of decrease.

## Implications

1

Still prioritize people skilled in JavaScript and HTML/CSS.

2

Employ more people skilled in Python and TypeScript.

3

Employ fewer people skilled in SQL and Bash/Shell/PowerShell.

# DATABASE TRENDS

## Current Year

Top 10 Databases Currently Used

## Next Year

Top 10 Databases Desired Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

## Findings

- Interest in MySQL, Microsoft SQL Server and SQLite may decrease next year.
- Interest in PostgreSQL and MongoDB increases compared to the current year.
- Redis and Elasticsearch may receive more interest next year.

## Implications

1

Employ fewer people skilled in MySQL, Microsoft SQL Server and SQLite.

2

Employ more people skilled in PostgreSQL and MongoDB.

3

Pay more attention to people skilled in Redis and Elasticsearch.

● Associate degree

# DISCUSSION

---

# OVERALL FINDINGS & IMPLICATIONS

## Findings

- Programming Languages – TypeScript is gaining significant interest and Python continues to grow as well.
- Databases – Redis, Elasticsearch, PostgreSQL and MongoDB are gaining more interest.
- Platforms – Linux and Docker remain prevailing while Windows is significantly dropping in interest.
- Web Frames – React.js and Vue.js gain substantial growth in the future.

## Implications

- Implication 1: Continue to focus on JavaScript and HTML/CSS but employ more people skilled in TypeScript and Python.
- Implication 2: Employ more people skilled in Redis, Elasticsearch, PostgreSQL, and MongoDB.
- Implication 3: Continue to focus on Linux, employ more people mastered in Docker, but make reductions to Windows.
- Implication 4: Employ more people skilled in Vue.js and React.js.

# CONCLUSION

## *Point 1*

Carve out budget in order to hire additional staff with skills needed to fill any gaps.

## *Point 2*

Set aside budget or establishes programs in place to train and upskill existing employees.

## *Point 3*

Make adjustment in staff whose skills no longer in demand.
